Join us for a presentation by

Keith Behling, Regional Manager for Pittsburgh Corning

Presents:

Designing with Glass Block—Visionary 2008

Pittsburgh Corning's commitment to excellence can be traced back as early as 1937, when a young company set out with a vision to set new standards. By providing innovative products for commercial, industrial, and residential building applications, the vision continues today. The results are as clear as our VUE® Pattern glass block. *Pittsburgh Corning's* glass block products continue to set the highest industry standards with a wide variety of patterns and sizes, fire rated assemblies, blast and ballistic assemblies, and curtain wall systems.

Keith Behling's interactive presentation on glass block includes the manufacturing process, vision control, product performance, codes, inspiring application, and designs as well as technical/installation information.

Participants will learn about the properties of Glass Block and how they can solve building design problems. The full range of different styles and types of Glass Block will be presented and participants will learn the appropriate application of each series of block. An understanding of the design and installation specification will complete the learning objective.

Don't miss this presentation.
